

Wonderful World

PROPOSAL:

This proposal seeks your participation and involvement in a new cinema-nature-art film produced by Gogol Lobmayr.

wonderful world, showcasing the most beautiful countries, cities and regions of our world.

The film will be produced for release in cinemas and TV winter 2012
We trust that this production will provide you with an ideal opportunity to promote the beauty of your country, region or city and hope it may be the perfect fit for your international marketing plans, strategy and budget.

Simply finding the most beautiful locations is not necessarily enough.
It is also important to find the perfect vantage point to incorporate your locations with our creative vision.

We produce gorgeous looking motion pictures in high resolution for the big screen in European cinemas and TV Stations around the world.

We will also make the footage used to create that film, available to you, for your own PR applications.

To achieve this quality of film, we use large S-35mm cameras, shoot in high negative film resolution, we then scan these images, frame by frame, on a high-end Tele Cine engine.

This process provides the highest quality HD images available today.

The consumer will most definitely see the difference viewing premium class video screens, either in standard resolution, or high resolution HD 1920/1080.

The extraordinary technical quality creates ideal cinematic visuals. These films and photos can then also be used as demonstration material in showrooms, trade fairs and at public shows.

The beauty of high-definition (HD) and Super 35mm - combined with the emotion of our award winning cinematography will thrill millions of potential travelling customers around the world.

Gogol Lobmayr has enjoyed an international and critical success with a body of work that is unsurpassed. His new production **wonderful world** as well as his latest films “Seven Seasons” and "Fascinating Nature" currently showing in European cinemas, creates a new recipe for the theatrical success of feature length nature documentaries.

The film, **Wonderful World**

In ninety-minutes, this production will present scenes of some of the most beautiful countries, cities and regions of the world.

Just seven minutes of pure visual promotion of your part of the world accompanied by originally composed music and little commentary.

All filmed sequences and photos taken in your country, region or city will be made available to you at no additional cost ready for you to copy at your expense on any system or format of your choosing for your own archive.

Processed in the ARRI laboratories of Munich, Germany, these images will be available to you eight weeks after shooting. You cannot sell this footage but you can use it for your own commercials and your own image archive.

The production schedule will be set at your discretion.

It is up to you to decide where and what to film and what would be good images for your country, city or region, to project and promote.

There will be no country to country competition.

Length of production: 2 weeks, or more, as needed. Filming may also be split into two different time periods of the year, depending on the opportunities, the seasons and associated activities and beauty provide.

The more footage we can film at the right light the better for your 7 minute part in that motion picture!

What we need from you to provide to the production

A guide who knows the locations at their best.

All transportation and accommodation for the team.

If possible! A helicopter or plane for aerial shots.

All flights from Munich, Germany and return, with excess baggage of 150kg.

All permits.

All other costs are taken care of by Gogol Lobmayr Film Production!

Post Script & Summary

- Besides IMAX, S-35mm Negative Film is the largest and best format.
- The film can be shown in all Cinemas as well as in all IMAX Theatres.
- You receive the latest cutting-edge cinema technology on any screen.
- You receive your own film archive at the best quality level for the future.
- You choose what to film. We add our creativity and help in every way.

To get the best pictures we need time to set up the equipment (camera crane, dolly, steadycam or helimount). Please be aware of this while organizing the itinerary for the shooting schedule.

Shots involving people must be made free of any claims for both of our protection. An authorization form must to be signed by each individual.

We look forward to the possibility of your contribute and to working with you to make this “Cinema Nature Art Film” **a success for all !**

Please see www.gogol-lobmayr.com or www.fascinating-nature.com

Besides more than 35 Travel documentaries from all over the world and many commercials, our latest cinema productions are as follows:

“Fascinating Nature”-

- The most spectacular landscapes in the World
- Colours of Earth
- Seven Seasons
